Kennet Meadows – The Panel Have Got it Wrong

We the undersigned call upon the planning Minister to delete Kennet Meadows as a development area from the Regional Plan. The Panel looking at the South East Plan were wrong to recommend 7500 houses north of the M4 at Reading, This area is in the functional floodplain and the Environment Agency say building there could result in floods in central Reading. We wish to see the Kennet floodplain protected in line with existing planning policies.
